

About the Fund

The EasyETFs Balanced AMETF aims to achieve moderate capital appreciation with reasonable volatility within the prudential asset allocation constraints. The asset allocation of the fund will be varied according to the manager's view on the macroeconomic outlook as well as the attractiveness of each asset class. The portfolio is constructed using proprietary ranking and weighting methodologies to select momentum, growth, value and quality shares. The portfolio is regulation 28 compliant.

Telephone number: +27 11 282 8000
Website: www.rmb.co.za
The trustee/custodian is registered as a trustee of collective investment schemes, in terms of the Collective Investment Schemes Control Act.

Disclaimers

Collective investment schemes in securities (CIS) are generally medium to long-term investments. The value of the participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CISs are traded at the ruling prices and can engage in scrip lending and borrowing. The CIS may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from EasyETFs. There is no guarantee in respect of capital or returns in the portfolio. The portfolio may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests in issue. Forward pricing is used.

The portfolio's total expense ratio (TER) reflects the percentage of the average net asset value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period, the TERs does not include information gathered over a full year. Transaction costs (TC) is the percentage of the value of the portfolio incurred as costs relating to the buying and selling of the portfolio's underlying assets. Transaction costs are a necessary cost in administering the portfolio and impacts portfolio returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of portfolio, investment decisions of the portfolio manager and the TER.

Exchange traded funds (ETFs) are listed on an exchange and may incur additional costs. Where foreign securities are included in the portfolio, there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks, and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees.

Performance has been calculated using net NAV to NAV numbers with income reinvested.

ETFs vs unit trusts: Whilst both unit trusts and ETFs are regulated and registered under the Collective Investment Schemes Control Act, 2002 (CISCA), ETFs trade on stock exchanges just like any other listed, tradable security. Unlike a unit trust, which can be bought or sold only at the end of the trading day, an ETF can be traded intraday, during exchange trading hours.

For any additional information such as fund prices or brochures, please go to <https://etfs.easyequities.co.za/>

EasyETFs and the trustee are registered and approved under CISCA. This document is for information purposes only and does not constitute or form part of any offer to issue or sell or any solicitation of any offer to subscribe for or purchase any particular investments.

Opinions expressed in this document may be changed without notice at any time after publication.
